

# SIHL INTERIOR DESIGN

Interior design –  
with high-quality inkjet  
media

# Colours, surfaces, structures – how we create rooms

## What is Interior Design?

We spend around 80 percent of our lives indoors. Offices, hotels, showrooms, doctors' surgeries and fitness studios are increasingly becoming comfort zones. Their main task today, is to radiate a friendly atmosphere that motivates customers and guests and calms patients.

Harmonious and distinctive interior designs are the contemporary answer to this requirement. Large surfaces are decorated in an imaginative way, deliberately creating moods. Walls, floors, ceilings, furniture and windows in interior design are not simply functional room components, but become eye-catchers, the centre of attention.

Sihl inkjet media create entire room worlds: digitally printed wallpapers, wall tattoos, window decorations, furniture, canvases, photo prints and much more. Printed fabrics extend the creative scope.

# Impressive right down to the last detail

## Design wall and ceiling

Walls and ceilings are the modern canvas for impressive designs. Functionality is the most important aspect when selecting a product. Sihl wallpapers meet the highest of standards, contain no traces of harmful substances or PVC. Our wallpapers are dimensionally stable, knock resistant, wipeable, can offer reinforcement to damaged surfaces and cover small cracks in the plaster. Our prepasted products have the perfect dose of paste on the back which is activated by emerging the printed panels into water. Our self-adhesive products can be easily attached and removed without leaving any residue. Sihl canvases do not show any white scoring and the photo paper reproduces even the smallest details perfectly.

## SIHL DESIGN2WALL

Wallpaper is an ever-present trend: since 1830 interiors have been decorated with printed wall coverings. Today architects, interior decorators and designers not only demand comprehensive designs but also functional value. The SIHL DESIGN2WALL collection offers high-quality digital print wallpapers with additional features such as:

- > Optimum fire protection for commercial application
- > Crack resistance and prevention
- > Wipeable surfaces
- > Easy to work with
- > Dry strippable
- > Dimensionally stable: seamless processing
- > All non-woven wallpapers are FSC®-certified

### NON-WOVEN WALLPAPER

Product	Number	Special Features	Ink compatibility
Non-woven design2wall UV 150	2500		
Non-woven design2wall Latex 200	2501		
Non-woven design2wall Aqua 180	2510		
Non-woven design2wall Sol 195 matt	2512		
Non-woven design2wall FR 210 satin	2517		
Prepasted non-woven design2wall FR 230 satin	2515		

### Our icons

Highest functionalities at a glance: our icons represent the special product features of Sihl's inkjet media.

- Environmentally friendly**  
FSC®-certification, PVC-free or other environmentally-friendly features
- Removable adhesive**  
Easily removable or repositionable materials without residue
- Permanent adhesive**  
Durable adhesion for long-lasting creations
- Outdoor resistant**  
Can be used outdoors
- Wipeable**  
Lasting aesthetics thanks to easy cleaning with water
- Resistant to chemical cleaning agents**  
Very robust surface, resistant to cleaning agents containing alcohol and disinfectants
- Knock resistant**  
Robust surface is particularly important where objects are moved around (e.g. suitcases in hotels)
- Breathable**  
Healthy indoor climate thanks to open-structured materials (e.g. non-woven glass textile or glass textile wallpapers)
- Tear-proof**  
Allows excellent processing and cutting properties even under difficult conditions
- Blockout**  
Opaque, completely blocks background
- Transparent**  
Translucent, for applications e.g. on glass
- Flame retardant**  
Tests confirm: Sihl media do not ignite and do not contribute to the formation of fires
- Dimensionally stable**  
Easy, seamless wallpaper processing thanks to high resistance to temperature and moisture
- Dry strippable**  
Changing wallpaper without having to soak saves time
- Covers cracks**  
Advantage during renovation especially in old buildings; small cracks can be covered, preventing them from spreading
- Prepasted**  
Perfectly dosed paste on the back of the wallpaper that is simply activated with water
- Inkjet with solvent ink**
- Inkjet with latex ink**
- Inkjet with UV ink**
- Inkjet with sublimation ink**
- Inkjet with aqueous ink**

# Conveying messages within a room

## GLASS TEXTILE WALLPAPERS

Glass textile wallpapers are particularly hard-wearing. They are ideal for high traffic rooms in frequent use. They are easy to process, easy to remove and they assist in maintaining a sustainable room climate. A plus, particularly in old buildings, is that the reinforcing effect of glass textile wallpapers prevents the spread of cracks.

Product	Number	Special features	Ink compatibility
Glass Textile design2wall Latex 260	2523		
Glass Textile design2wall HealthClean 295	2525		

## WALL TATTOOS

Wall stickers are popular design elements for living spaces. But companies and institutions are also discovering the use of decorative elements to their advantage. Wherever customers, patients and visitors gather, stickers offer the opportunity to display creative messages, company logos and other stylistic elements of corporate design. Sihl wall stickers are easy to apply and can be either removable or permanently adhered to the wall.

## CANVAS

Pictures change the ambience of rooms, creating a comfortable atmosphere for well-being, dreams and reflection. High quality Sihl canvas materials combined with professional printing systems create special impressions.

Product	Number	Special features	Ink compatibility
Picasso Canvas Prime Satin	3609		  
Nina Canvas Plus Matt AQ	3578		

## PHOTO PRINT

Large format photographs should fascinate from every perspective within a room. The material and the surface dominate the way the images look and often bring out the details. With Sihl's photo media, brilliant, sharp and colour-intensive prints are created that inspire observers.

Product	Number	Ink compatibility
TriSolv PhotoArt Paper 210	3699	  
Rocket Photo Paper PE 190 satin	3372	
Glamour S Photo Board satin	3145	  

## Home textiles

Home textiles enhance the living ambience and convey a feeling of security. Sihl transfer papers for dye sublimation printing can be used to produce curtains, cushions and other decorative textile applications.

SubliColor Universal Paper 70	3782	
SubliColor Universal Paper 90	3792	
SubliColor SuperDry Paper 75	3781	
SubliColor SuperDry Paper 95	3791	

## SIHL SUBLICOLOR

Optimised coatings and the best processing properties: the innovative SIHL SUBLICOLOR media are ideally suited for all common dye sub machines and inks. This gives users clear competitive advantages:

- > Easy handling thanks to optimal flatness
- > High efficiency thanks to short drying times
- > Excellent print results
- > High transfer rates, little waste

**Did you know?**

Amongst other things, Dye Sublimation technology is increasingly being used on hard substrates for the personalisation and design of furniture. This requires a special coating with polyester content. After sublimation, the end products exhibit high scratch resistance, colour stability and water resistance, making them very easy to clean. For this reason, this process is perfectly suited to heavy-duty objects such as tables, metal plates or ceramics.

# Showcase details

## Window

Glass doors or exterior windows can be beautifully showcased, thus contributing to the interior design. Sihl window films not only function as decoration, but also protect against unwanted attention from outside and against strong sunlight.
